ABOUT ME

I am an experienced and passionate Software Developer with a keen emphasis on Front-end and User Design Experience.

EXPERIENCE

WebDeveloper Developer, Rock-hills Church,   Sept 2022 — **Present 2022**

Manhattan, Kansas, United State

Maintaining Manhattan's local community church's website & mobile app. My responsibility is to collaborate with Media team in order to update Events, Pages, update layout and styling in a timely manner.

Technologies: PHP, HTML, CSS, Javascript, jQuery, UXDesign, Custom Plugins, Wordpress, Adobe XD.

Front-End Developer, Goyk Productions Dec 2021 — Mar 2022

Remote, United States

https://of.tv/

My role at OFTV was to focus on user-centered experience Design. Utilizing best practices in Object Oriented Programming(OOP) such as MVC while developing a CRUD, RESTful API application. Wordpress custom Hooks and Functions with PHP8 and HTML. Fetching data form API and MySQL Database to loading the images Asynchronously "Lazy loading" and improving rending speed of the overall site. Lastly, I worked with a UXDesigner and Backend Engineer in order to create a robust swiper hero slider and redesign the site style with over 1 Million+ monthly users.

Technologies: HTML, CSS, Javascript, jQuery, PHP, MySQL, Zype API, Swiper API, Git, GitHub, Wordpress, Custom REST API, Plugins, WP Hooks, WP Classes, Methods, Functions.

Software Engineer, Garbagedash LLC, Mar 2019 — Aug 2021

Corona, California, United States

Developed robust and user-friendly UI interface following HID Guidelines and interaction flow of the application using Swift OOP language and MVC architectural pattern. Delivered UIKit Mockups, Frame-wire for Mobile and Web responsive layouts. Initially, as a Generalist UX Designer role required me to wear multiple hats and take on multiple roles throughout the product's life cycle.

Website Developer, Chiropractor Freelance Apr 2017 — Sep 2017

Irvine, California, United States

http://irvinechiropractor.com/

Setup a custom and install a theme in WordPress CMS, PHP, Custom Plugins, SEO, Develop content and Layout design, wireframe, prototype.

UX Designer, TansIntlt Freelance Apr 2016 — Nov 2016

Anaheim, California, United States

https://www.transintl.com/mac-memory/

Provided UX Design, logo Restoration, Mockups, Frame-wires and delivered a user-friendly responsive layout for the E-commerce site.

Front-End Developer Intern, MXLiveEnt. Mar 2012 — Nov 2014

Santa Ana, California, United States

My role as an Intern was to ensure and maintain Callecuatro.com using WordPress CMS with tasks ranging from SEO, Graphic Design, Updating plug-ins, HTML, CSS to updating content for its busy site.

SELECTED PROJECTS

Multi-Page React Portfolio

July 2022 — July 2022

Visit my live website: https://sugary-dark-coffee.netlify.app/

Develop a Mobile responsive, React Multi-Page Application. React-Router for the navigation.Styled with React-Boostrap and CSS for the styling deployed on a Netlify Hosting infrastructure.

Technologies: JSX, React, React-Router, Axios, Netlify, HTML5, React-Boostrap, CSS3, JS, jQuery, NPM, Git, Github, Swiper API.

Fullstack Developer Project

Remote, United States

Visit my live website: https://github.com/chanqoDev/Typescript-react-formik-form

Build a React SPA Landing page, styled with Material-UI for custom components and CSS on the Client side. The back-end API is created as an HTTP Typescript Node REST API on a AWS Lambda and serverless framework, connected to a noSQL DynamoDB as the database.

Technologies: Typescript, React, JSON, Formik, Node, Material-UI, HTML5, CSS3, AWS, Lambda, REST API, Serverless, Yarn, Git, Github, DynamoDB, JSX, Postman, RESTful API Design.

Github Open Source Developer, NFT Display Gallery, Remote
Dec 2021- **Present** 2022

Visit my live website: https://chanqodev.github.io/ChrisDevWok_v2021/

Created a Modern NFT Gallery with OpenSea marketplace integration. Connect to MetaMask contract on Rinkeby Ethereum network for back-end. Dynamically Pull live data from OpenSea API and use REACT to dynamically render NFT info details into the components cards to then

be styled with CSS. Used Yarn to install dependencies into JSON files and start build in order to deploy on Github pages.

Technologies: WEB3.0-DAPP, REACT, Javascript, CSS, Flexbox, HTML, Git, GitHub, Yarn, NPM.
